

## Minutes from Class February 10, 2004

- Discussed Architectural Document
  - Reviewed new format and made changes
  - Please see attached document for updated changes and final version as of right now
  - If there are no more changes, this document will be the final document that Professor Gum will take to his meeting on Thursday, February 12, 2004
- Each subsystem group broke off and started to discuss their preliminary design
- We received our first robot today
  - Robot was able to go:
    - Forward
    - Reverse
    - Pivot
    - 180 degree turn
    - 360 degree turn
  - Going forward – 3.6V; 1.8A
    - For 3 feet it took 7 seconds running it at 3.6V
  - Steering was possible
