

Minutes from Class February 11, 2004

- Professor Gum informed us that the ATMEL Development Kits were in and you were allowed to sign them out and get started
- Professor Gum informed us that one of our fellow senior ECE's, Erik, will be helping us out with PC layout design in ~ 2 weeks
- Professor Gum met with his friends from Bell Labs last Thursday, February 12, 2004
 - He gave them a deadline to get back with comments/concerns by this Wednesday, February 18, 2004 by noon
- Professor Gum wants us to start thinking about the interface
 - What is going on back and forth?
 - Events
 - Soon we will need to mark these events into a test plan
- Manon informed each group that they will need to come up with a flow diagram for their subsystem (similar to the Functional Block Diagram)
 - Due date not yet determined
- Broke into groups and discussed design
